

3rd IRCA - EUROPE Conference „Sauerdough for the Land“ 01.06.2021 (Zoom)

The biblical image of the sourdough bears in this days a stronger importance than ever. In times when we talk about reconstruction and resilience it is important to see what the role of churches in general and the importance of rural communities in particular can be. As christians we carry the responsibility not just for our own families, our direct environment and our communities in which we are active, but also far beyond these. This unifying force of the christian faith and christian hope gives us strength not just for our work in the different regions of Europe, but also across all borders.

Program

8:45 (CET) Participants registration on Zoom
